

Choosing The Right Specialist

by: Al DeSimone, M.D., Board Certified Orthopedic Surgeon

Anterior Cruciate Ligament (ACL) ruptures remain one of the most devastating injuries to the young competitive athlete. The ACL is the major supporting ligament within the knee joint providing stability to the knee during running, cutting and twisting sports. Though a traumatic collision with another athlete can cause a rupture to the ACL, a sudden alteration in speed and/or change in direction can also predispose an athlete to this injury.

The athlete will often describe a loud popping sensation within the knee joint and experience severe pain, swelling and weakness combined with an inability to ambulate. Diagnosis is usually made by obtaining a proper history of injury and by performing a thorough clinical examination of the involved knee. X-rays and MRIs are extremely beneficial during this evaluation and will often help rule-out concomitant injuries to the adjacent ligaments, menisci and/or cartilage.

The goal of treatment is to return the athlete back to his or her prior level of activity, including competitive sports. Rarely, one may consider conservative/non-operative treatment for those patients that are extremely sedentary and inactive in athletics. In this incidence, treatment may include rehabilitation, bracing and restriction to certain activities. For those individuals who are competitive athletes and participate in high-demand twisting sports, surgical ACL reconstruction is the treatment of choice.

Over the last several years, I have seen numerous patients with surgical failures from prior ACL reconstructions that have been referred to my office for further consultation and revision surgery. Having performed over 1,700 Anterior Cruciate Ligament reconstructions and over 200 revision surgical procedures, I remain convinced that this procedure is extremely technical and should

be treated with state-of-the-art surgical technique and attention to detail. Though re-injury may be a common cause of failure subsequent to ACL reconstruction, technique related failures are commonly seen and can often occur from improper graft selection, tunnel placement, graft tensioning, and/or methods of fixation. Timing of surgery and proper postoperative instructions, including return to athletics, also play a significant role in prevention of re-injury. In concordance with the literature barring any anatomical or growth related considerations, I prefer to utilize bone-patella tendon-bone autograft for the young, high-demand athlete.

Treatment of an Anterior Cruciate Ligament rupture continues to be a challenging problem for the high school, collegiate and community athletes. It is imperative that young individuals (and parents) understand the importance of pursuing treatment by an experienced surgeon, preferably with a subspecialty interest in knee ligament reconstruction. Failure to do so may predispose an athlete to additional surgery and prevent return to sports in a timely manner. For more information about treatment for a ruptured ACL, contact South Florida Institute of Sports Medicine located at 1600 Town Center Blvd., Suite C, Weston, FL 33326, (954) 389-5900.

SOUTH FLORIDA INSTITUTE OF SPORTS MEDICINE

Sports Medicine Associates
of South Florida, P.A.
(Independent Medical Practice)

Foot, Ankle & Leg Specialists
of South Florida, Inc.
(Independent Medical Practice)

EXPERTISE &
COMMITMENT

COMPASSION &
KNOWLEDGE

PEDIATRIC, ADOLESCENT & ADULT SPORTS MEDICINE

SOUTH FLORIDA'S EXPERTS

Dr. Mark Fishman, D.O.
Board Certified
Interventional Spine Specialist

Dr. David Shenassa, M.D.
Board Qualified
Hand & Wrist Surgeon

Dr. Al DeSimone, M.D.
Board Certified
Shoulder & Knee Specialist

Dr. Carlo Messina, D.P.M.
Board Certified
Foot, Ankle & Leg Specialist

Dr. Michael Cohen, D.P.M.
Board Certified
Foot, Ankle, & Leg Specialist

Dr. Alexander Bertot, M.D.
Board Certified
Sports Medicine Specialist

Dr. Fernando Moya, M.D., PH.D.
Board Certified
Shoulder & Knee Specialist

Dr. Robert Sheinberg, D.P.M.
Board Certified
Foot, Ankle & Leg Specialist

Dr. Nathan Vela, D.P.M.
Board Qualified
Foot, Ankle, & Leg Specialist
